

Welcome to The DRep Collective

Meeting #2

For Cardano

January 15, 2025

Key Concepts from Last Meeting

- Conway's Law
- Meta data
- Human Sensory Networks
- Legal Protection & Income for DReps
- Organizational Structure

Philosophy: The law is based on the reasoning that in order for a product to function, the authors and designers of its component parts must communicate with each other in order to ensure compatibility between the components. Therefore, the technical structure of a system will reflect the social boundaries of the organizations.

What is Conway's Law?

Variations and Examples:

If you have four groups working on a compiler, you'll get a 4-pass compiler.

Or

If a group of N persons implements a COBOL compiler, there will be $N-1$ passes. Someone in the group has to be the manager.

Where We Are at Today/Meeting Recap

Q1

**714**Total Registered
DReps**489**

Total Active DReps

7Total Governance
Actions**4.24B**Total Voting
Power in ₳**80.56K**Total Registered
Stake Addresses

Milestones

01/7/25

Kickoff Meeting

04/01/25

First 100 Users +
Passport &
Ecosystem Map

07/01/25

First 300 Users
Metadata Complete

02/01/25

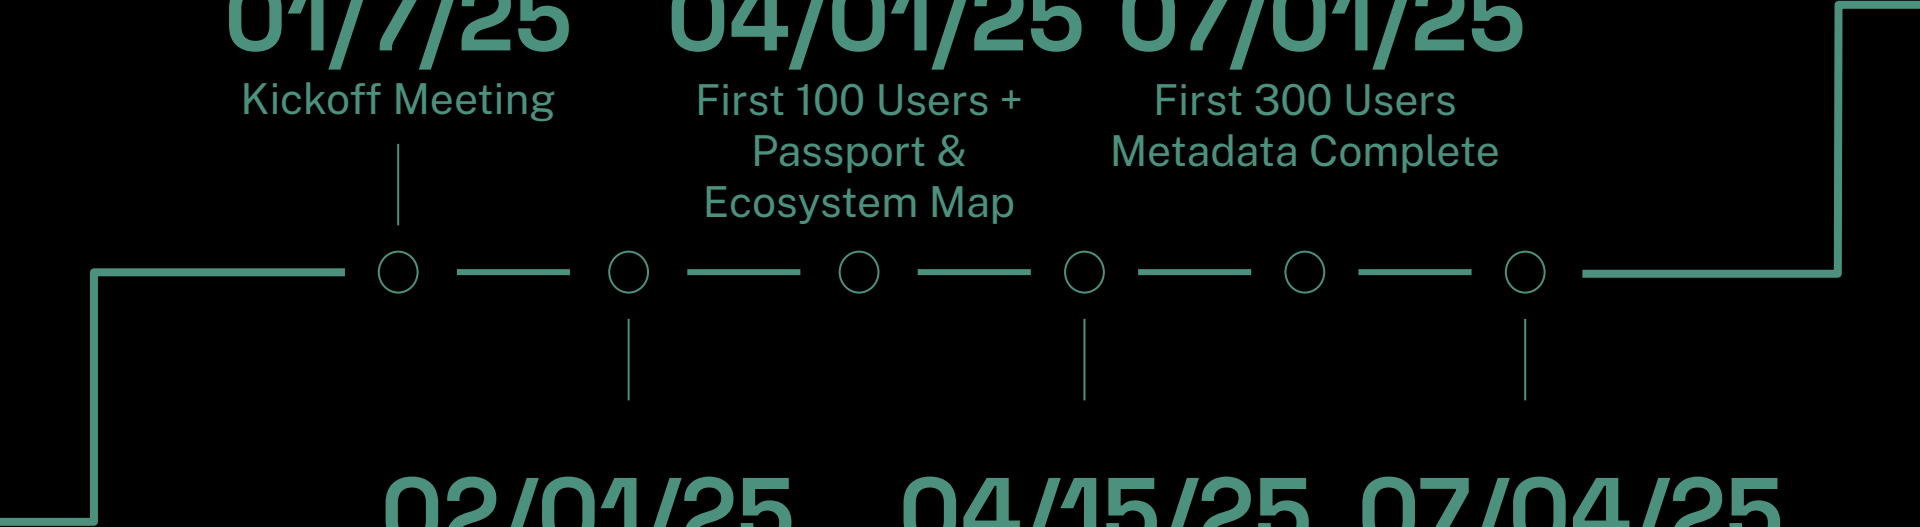

Meta Data
Roadmap

04/15/25

Voting Platform
Designed

07/04/25

Voting Platform
Finalized

01

Metadata Standards

- CIP-0119
- CIP-1694
- CIP-0100 (Expand Upon)
- Base Layer vs Changeable Layer

02

Ecosystem Map

+

- Interactive Map
- Educational & Informative
- Corresponds to various Gov actions on gov.tools.
- Updated Yearly or Quarterly as needed
- Human Sensory Networks
- Airdop

03

Voting Passport

+

- Stamps for Voting
- Stamps for different ecosystems explored
- Annually Renewed

04

Internal Voting Platform

- Soul Bound “Passport” NFT’s allow users to possibly vote anonymously?
- Allows for DRep coordination in case of attacks.
- Collectivize to get paid and have legal protection.

Ideas & suggestion

Into the Metadata

Permanent Data

- Finalized Votes (Voting App)
- DRep I.D. (NFT)
- Wallet I.D (NFT)

Data that Changes

- Smart contract to be able to represent a vote yes or no with a datum. (Voting Tool)
- Stamps on Passport (NFT)

Not Sure Yet

- DRep I.D. as Passport Name?
- Mintable Map/Airdrop

Key Processes

Cardano's ecosystem faces a human interoperability challenge. The community struggles to see beyond immediate networks.

Problem Statement

Cardano's ecosystem faces a human interoperability challenge as it transitions to full self-governance. The core issue: How can community members, especially potential Decentralized Representatives (DReps), effectively represent and contribute to a community they can't fully see or understand?

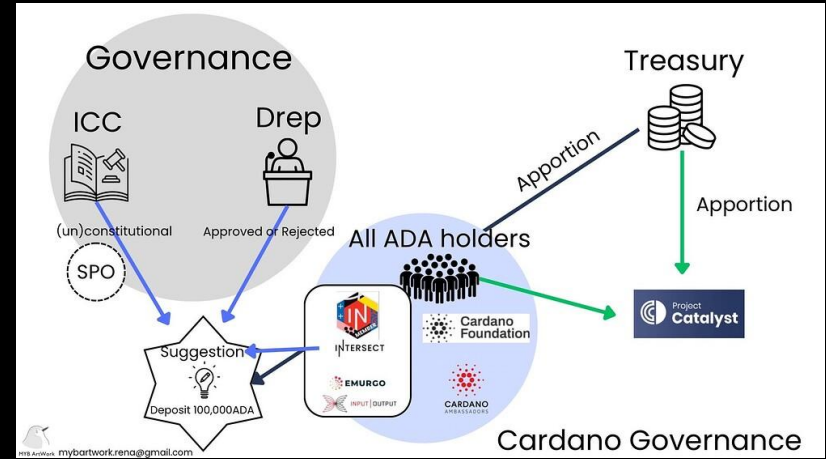

Problems

Limited visibility: DReps struggle to engage with unknown community members

Representation dilemma: Difficulty in representing an incompletely understood community

Proximity bias: DReps' understanding is often restricted to their immediate networks influenced by factors including region, language and the roles in the industry the DRep plays.

Role ambiguity: Unclear delineation of DRep responsibilities within the ecosystem

Minting Page

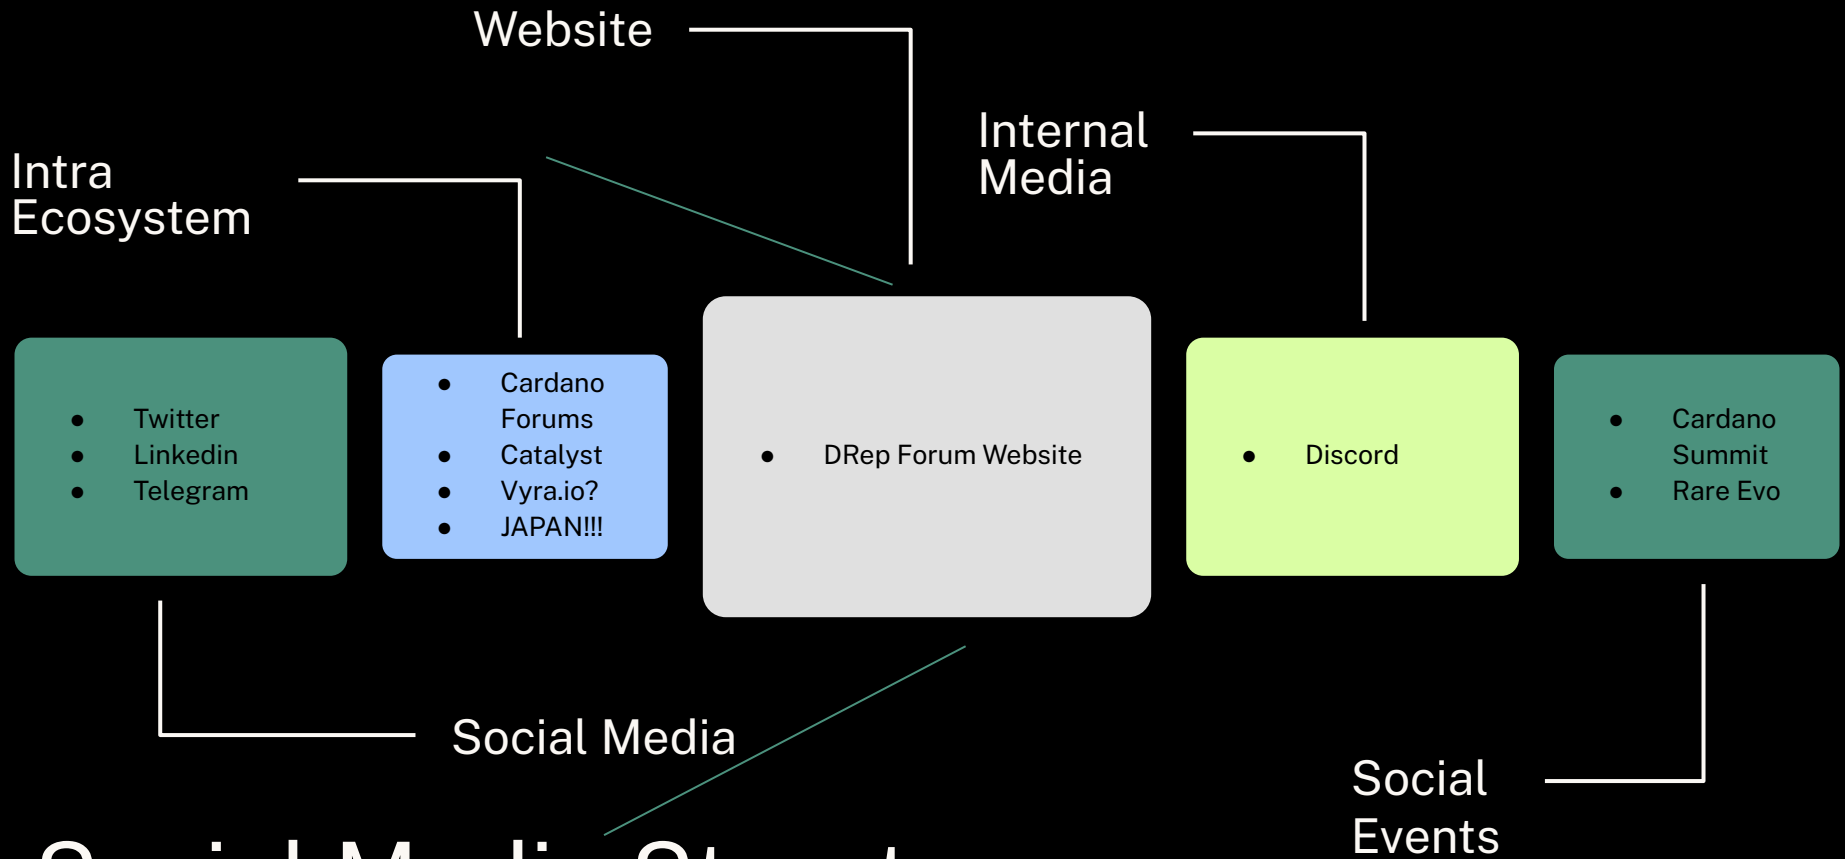

Minting Page Examples:

Certificates, Reputation system, Educational Degrees, Memberships, Authenticity, Personalization, Eliminates Fraud.

Gage participation with this and the voting system.

Social Media Structure

Offchain: Possible Voting Bylaws

Voting bylaws can be used to drive the ecosystem in several directions:

- Can increase participation
- Can make sure we get the threshold to propose our own governance actions such as a treasury withdrawal for funding
- Can protect the community from outside influence
- Can help foster discussion if people know they have to vote
- Can act as a way to make sure delegates get good service
- Creates a good reputation
- Can purchase legal protection
- Easy Onboarding

○ Tier 1 Voting Requirement

To remain in the collective you must vote on a gov action deemed tier 1. Tier 1 voting actions are considered attacks on the chain such as a sybil attack or massive treasury withdraw from an entity such as binance.

○ Tier 2 Voting Requirements

Tier 2 voting requirements are proposals such as new constitutional committee members or new constitutions. It doesn't matter who or what you vote for but you must vote yes/no.

○ Tier 3 Voting Requirements

Can vote yes/no or abstain but must vote.

○ Tier 4 Voting Requirements

Can vote or not vote however one pleases.

Thank you for participating!
